Statement for Toxic Substances Control Act (TSCA) 1976 Section 6 (h)

Dear Sir or Madam,

we have received your inquiry regarding TSCA compliance.

In general, we are obliged to notify if we use materials / substances containing e.g. lead (REACH SVHC - Substances of Very High Concern - CAS: 7439-92-1) in aluminum and copper alloys.

Within the RoHS regulation, we are compliant by meeting the limits in Exemption III 6a to 6c.

TSCA - US Federal Regulation

TSCA is a U.S. federal regulation enforcing a broad range of requirements and restrictions on the presence of certain chemical substances in U.S. commerce. Under TSCA, the U.S. Environmental Protection Agency (EPA) regulates substances in products manufactured in or imported into the U.S., evaluates substances for restrictions, and imposes penalties for noncompliance.

On Jan. 6, 2021, U.S. EPA published new regulations under TSCA Section 6(h) to restrict the import and use of five persistent, bioaccumulative and toxic (PBT) chemicals.

Substances/Chemicals Affected

- PIP (3:1) (phenol, isopropylated phosphate (3:1), CAS 68937-41-7).
- DecaBDE (decabromodiphenyl ether, CAS 1163-19-5)
- 2,4,6 TTBP (2,4,6-tris(tert-butyl)phenol, CAS 732-26-3)
- HCBd (hexachlorobutadiene, CAS 87-68-3)
- PCTP (pentachlorothiophenol, CAS 133-49-3)

Confirmation

Amphenol Precision Optics GmbH hereby certifies that, based on current knowledge of all production areas, supplier items and the chemicals used therein, our products are not subject to any restriction under TSCA Selection 6.

Specific Part Number:

With best regards,

Amphenol Precision Optics GmbH

(i.A. Mirko Läufer, Head of Quality Management)
